

## OCEAN DISCOVERY CRUISE

Why is the sea salty? Find out on an exciting, educational cruise aboard a 54-foot, research vessel. Join a team of knowledgeable ocean explorers and discover the life aquatic while touring the historic Woods Hole, a major center of marine science. Pull lobster traps, drag a plankton net, view tiny sea creatures through the Discovery Scope - this mini research voyage is packed to the gills with fun facts, and activities. Don't miss the boat!

- Meet your experienced guide at the marine research center
- Climb aboard the Sea Star and learn how scientists study the ocean
- Participate in handling the equipment, collecting data, and making new discoveries
- Take home a commemorative hand painted sweatshirt and whole new appreciation for the sea
