

SAN ANDREAS FAULT EXPEDITION

It's your fault! Discover where earthquakes are born on a guided exploration of the San Andreas Fault. See where the unpredictable forces of nature have created a striking landscape of open desert valleys, ridges, and dramatically colored and eroded canyons. An expert naturalist guide will lead you through California's most infamous natural feature. Unusual sandstone formations, multi-hued mineral deposits and fascinating geology are highlights of the tour.

- Travel to and from the fault in fully-equipped, luxury Hummer
- Explore what geologists have called “the most tortured landscape on earth”
- Witness first-hand the powerful and destructive forces of our planets' giant tectonic plates
- Observe how a wide variety of plants and animals adapted to life in the desert
- Leave with a new appreciation and understanding for this 750-mile geological wonder
