

PRIVATE SEA LIFE DISCOVERY CRUISE

Sea for yourself! Get a private, hands-on introduction to the primary disciplines of oceanography from a knowledgeable team of researchers and scientists. Collect a crew of up to 30 guests and discover the life aquatic aboard a 34-foot, fully equipped research vessel. Whether it's the mysterious horseshoe crab, the squirting squid, or the mighty shark, choose a critter that intrigues you most and study it closely. This mini research voyage is packed to the gills with fun, facts, and more.

- Meet your experienced guide at the marine research center
- Climb aboard the Sea Star and learn how scientists study the ocean
- Choose your critter of focus from horseshoe crabs or lobsters to whelks (large marine snails) or starfish
- Participate in handling the equipment, collecting data, and making new discoveries
- Leave with a new appreciation and understanding for the science of the sea
