

## INTRO TO COURT TENNIS

Have a ball playing a game that requires the agility of tennis, the strategy of chess, and the subtlety of golf. It's court tennis - a body and mind-bracing sport that is positively medieval! Spinning serves, slicing shots, and sensational strokes are mastered with hand crafted racquets. Hand-sewn balls are volleyed about in a court that has remained the same since 11th Century monks invented the game as the king of sports for the sport of kings.

- Start with an introduction to the game and receive private lessons from a pro
- Learn the history of this racquet sport and the rules of the game
- Then warm up and play with the pro; racquet and balls provided
- Be among the elite few who play in this private club - one of only 10 courts in the US and 45 in the world
